Who should take this program?

ReActivate Your Certification

Haven't been scuba diving lately and want a quick refresher? The ReActivate™ program is the perfect way to brush up on your knowledge and skills from the PADI Open Water Diver Course before jumping back into the water. Whether you want a few reminders or need to go over the basics, ReActivate is personalized for you: You conveniently review scuba concepts on your tablet, mobile device or computer, then go diving with our PADI Professional. It's quick and easy, and a good way to prepare for your next Diving Course or get ready for a Warm Water Vacation The best part is, divers who complete both the knowledge and in-water skill refresher receive a replacement certification card with a ReActivated thru date on it.

Any PADI certified diver who wants a refresher or pre-travel update should ReActivate. Dive shops appreciate seeing a recent ReActivate date on your certification card because it means you're ready to dive in.

If you want to learn more about diving in a new area or in different dive conditions, also ask East Coast Diving Center staff about completing a Discover Local Diving experience at a local dive site.

*Your PADI certification does not expire. Participation in PADI ReActivate™ is not mandatory, but recommended as an easy way to refresh your foundational scuba safety knowledge and skills if you haven't been diving in a while. Divers who complete both the knowledge and in-water skill refresher receive a replacement certification card with a "ReActivated thru" date on it.

What will you learn?

Using *ReActivate Touch* (for tablets or mobile devices) or ReActivate Online (for your personal computer), you'll immerse yourself in dive scenarios and make decisions that test your understanding of important dive safety concepts, dive planning essentials and problem management. Move through ReActivate at your own pace and delve deeper into topics when you need or want to.

In the water, our PADI Professionals will help you regain comfort and confidence in scuba diving. You'll practice a few safety-related skills and then go over anything you specifically want to review.

How can you start learning now?

Contact East Coast Diving Center to get *ReActivate Touch* or ReActivate Online and start working through the scenarios or, download the [PADI App](#) to your tablet or mobile device (if you haven't already) and purchase *ReActivate* to get started immediately. Don't forget to associate with S28 East Coast Diving Center, Morganville when you register. Then, call us to schedule your ReActivate water skills sessions

What gear will you use?

You'll use a full set of SCUBA gear, regulator, BCD, scuba tank and mask, snorkel, fins. The exposure protection you need will depend on whether you dive in a pool, confined water or open water dive site. Your East Coast Diving Center staff will explain other equipment you may need to ReActivate.

Next Step

Get back in the water with ReActivate:

- Enroll in a ReActivate program at East Coast Diving Center.
- [ReActivate your certification today!](#) Remember to associate with S28 East Coast Diving Center, Morganville if enrolling on-line
- Take the Advanced Open Water course or one of the many Specialties.
- Plan your next Diving Vacation with us or we can help you plan your own get away.
